ULTRA-TAP TV/FM Wall Outlet

Model UT-13

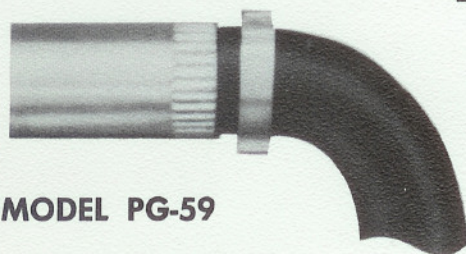

MODEL UT-13

DESCRIPTION

Model UT-13 is the newest addition to the famous ULTRA-TAP line. This flush-mounting terminal wall outlet is used wherever both a TV and an FM set are supplied with signal from the same outlet. Excellent isolation between the TV and FM terminals of the UT-13 prevents interference to either set, even when both are in use. Model UT-13 is supplied via RG-59/U cable from a remote pressure tap or hybrid splitter. The unit is simple to install and the handsome mounting plate is available in several finishes.

NOW . . . A NEW PUSH-ON MALE CABLE CONNECTOR

Model PG-59

MODEL PG-59

The connector with a silver-plated brass center-pin
**CONNECT OR DISCONNECT FROM ANY ULTRA-TAP
AS OFTEN AS YOU WISH**

DESCRIPTION

The new Model PG-59 push-on male connector meets the tough requirements of repeated connections and disconnections. This unit mates with any Jerrold female "G" chassis fitting. It provides a fast, firm connection, with equally fast disconnection. RG-59/U cable is permanently bonded to the PG-59 by a crimped ferrule. Model PG-59 incorporates a clutch collet which siezes the bare center conductor of the cable. This collet terminates in a silver-plated brass pin which mates with a clutch collet in a female "G" chassis fitting. The ruggedized PG-59 connector is built to stand the heavy duty required in hospitals, schools, etc.
